

# Capital Facilities Element

---

## Background

**General.** The Capital Facilities Element identifies the City’s existing and needed capital facilities to support the delivery of public services to the community and its visitors. It also provides related goals and standards for meeting the community’s needs. Capital facilities include land and buildings for public purpose. In addition to serving existing residents, capital facilities are planned to meet the community’s needs as new development occurs in the future. Because Edmonds is a mature city with a full complement of facilities and services, most capital facility planning is targeted to maintaining existing level of service standards and expanding the quality of life of its citizens with new or expanded facilities.

Service standards are described in the transportation, utility and parks elements. These service standards are used to assist in developing both short and long range capital improvements projects. The capital facilities element identifies these projects and their funding sources for a six-year period. This schedule will be updated on an annual basis and integrated with the City’s budget process. The element also identifies public facility needs for the 20-year planning period. Funding sources will vary as specific projects are developed, and will include a variety of public and private sources. The City coordinates on the siting of essential public facilities with its neighboring cities and the county.

**Concurrency Management.** Introduced in 1990 by the Washington State Legislature with the enactment of the Growth Management Act, the term “concurrency management” is specifically required for transportation facilities and is defined as the process that cities use to ensure that no development or permit is approved by the city unless the necessary capital facilities are in place or that funding is adequate to complete the required improvements within six years. Concurrency for transportation systems is tied to established level-of-service standards. The City has also established an impact fee system for parks in order to provide for growth-related facilities. Other facilities, such as water and sewer systems, are funded and maintained through utility plans and fee structures, as well as grant-supported projects.

**Inventory.** Publicly owned capital facilities in the City are comprised primarily of those owned by the City of Edmonds. A few of these facilities, while owned by the City, are operated by other entities. For example, fire stations are currently owned by the City but operated by Fire District 1. Other facilities are owned by different governmental agencies, such as the Port of Edmonds and the Edmonds School District.

Following is a map and list of public-owned capital facilities, as identified in 2015. This inventory focuses on larger properties and buildings; it does not include transportation or utility facilities, since these are discussed, respectively, in the Comprehensive Plan’s Transportation Element and in functional plans referenced in the Comprehensive Plan’s Utilities Element.

Note: While City-owned parks are included in this Element's inventory, more specific details about them can be found in the Parks Recreation and Open Space Plan, which is also adopted as an element of the Comprehensive Plan.

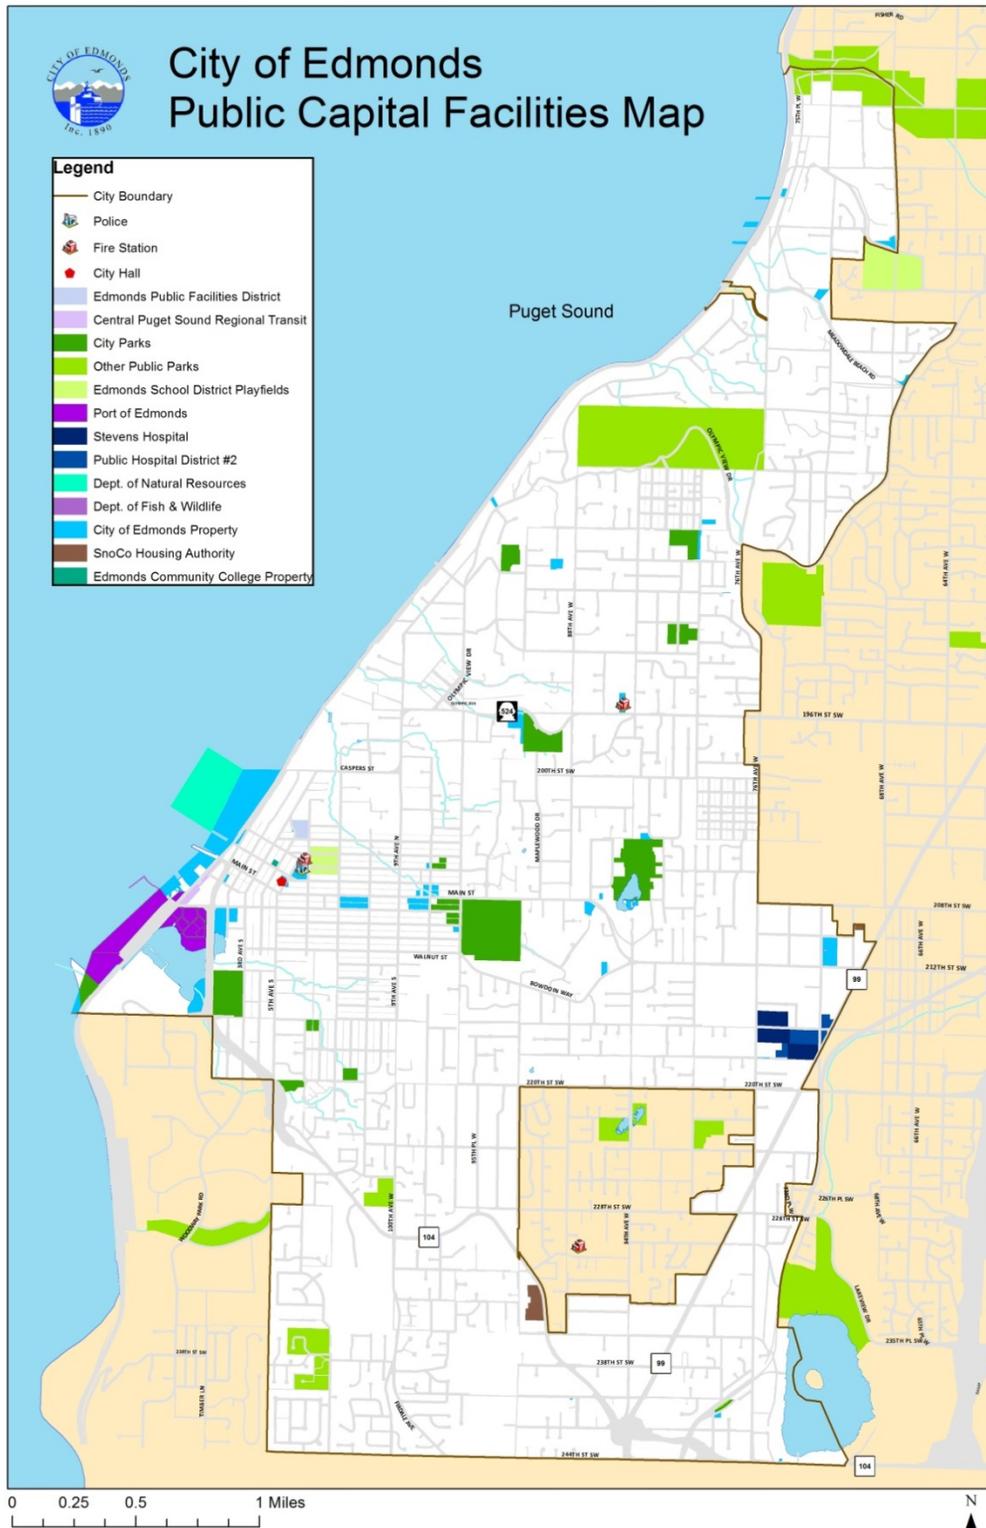

Figure 41: Public Capital Facilities Map

Following is a 2015 map of facilities owned by the Edmonds School District (ESD).

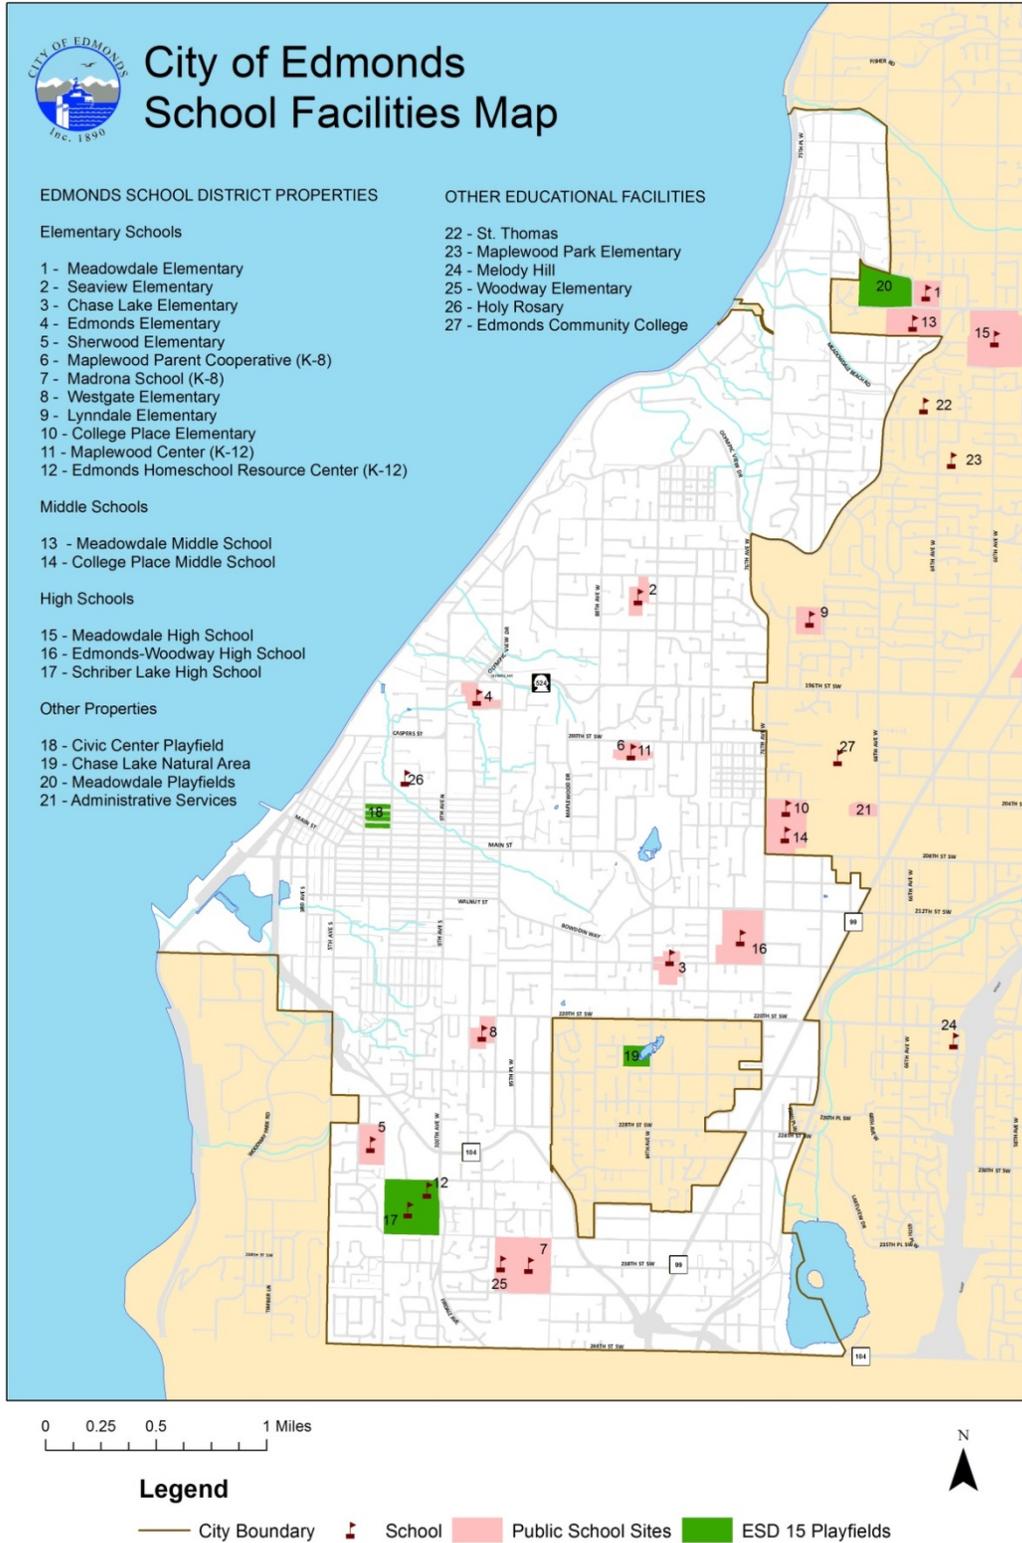

Figure 42: School Facilities Map

Following is a list of publicly-owned facilities in Edmonds and other nearby areas.

Figure 43: List of Publicly-owned Capital Facilities

---

## Future Needs

Future capital facility needs and projects have been identified for the City in a special section “Capital Facilities Projects” at the end of this element. The section is divided into three subsections: General, Transportation, and Stormwater. Within each subsection is a table of capital projects and their anticipated financing over a six-year period. Each section also contains information on longer-term capital projects, for which funding may not yet be available. Some of the projects in the latter category have been considered for an extended period of time and their exact descriptions/costs have not been recently updated.

The Parks, Recreation, and Open Space Plan, adopted as an element of the Comprehensive Plan, includes more information on future capital facility needs for parks, recreation, and open space.

---

## Capital Facilities Goals & Policies

This section identifies key goals for the City in managing its capital facilities.

Each key goal in this element (or section) is identified by an alphabet letter (for example, “D”). Goals are typically followed by associated policies and these are identified by the letter of the goal and a sequential number (for example, “D.2”)

**Capital Facilities Goal A.** Establish service standards for all city-provided services in order to provide public facilities and services that meet citizens’ needs and enhance the community’s quality of life.

- A.1 Provide capital facility improvements in order to meet or exceed established service standards.
- A.2 Coordinate and set service standards that meet the goals and policies of the comprehensive plan.
- A.3 Evaluate and prioritize capital facility projects according to how they achieve established criteria and the goals and policies of the comprehensive plan. Examples of typical criteria include the following:
  - A.3.a. Whether the project is needed to achieve or maintain a service standard.
  - A.3.b. Whether the facility will contribute to the elimination of a public hazard or safety concern.
  - A.3.c. Whether the facility is financially feasible.
  - A.3.d. The extent to which the facility will impact annual and long-term budgets.
  - A.3.e. Whether the facility is consistent with future facility needs and site considerations.
  - A.3.f. The extent to which the facility will impact natural and cultural resources.

**Capital Facilities Goal B.** Evaluate and coordinate the provision of capital facility improvements with both annual budgeting and long-term financial planning.

- B.1. Capital budget decisions will be made consistent with the Edmonds comprehensive plan in accordance with RCW 36.70A.120.
- B.2. If probable funding falls short of meeting identified needs, the comprehensive plan shall be re-examined to review how additional funding will be raised, or how land use assumptions will be reassessed to ensure that established service standards will be met.
- B.3. Capital improvements will be planned to achieve fiscal responsibility, maintenance of existing facilities, and protect the quality of life of the community.
- B.4. The City will continue to adopt multi-year budgets and six-year capital improvement programs as part of its annual budget and planning process.
- B.5. Six-year capital improvement programs will be coordinated with long-term (at least 20-year) capital needs

**Capital Facilities Goal C.** Seek to use a coordinated array of mechanisms and sources of revenue to fund needed capital facilities.

- C.1. Make use of the City's budget and structure of funds to identify adequate funding sources for capital facilities.
- C.2. Seek grants and cooperative funding agreements to supplement internal City funding of capital facilities that benefit the general public or that are required to meet needs not generated solely by Edmonds residents.
- C.3. Make use of regulatory and incentive programs to assist in achieving service standards for City services.

**Capital Facilities Goal D.** Strategically locate new facilities to complement the delivery of services and provide for efficient and convenient access.

- D.1. The location of new or improved capital facilities should take into account existing service delivery systems and the location and access of service populations.
- D.2. Ensure that the siting of essential public facilities is not precluded by the implementation of this Comprehensive Plan.

**Capital Facilities Goal E.** Essential public facilities are necessary to support orderly growth and the delivery of public services. The City's goal is to ensure that these facilities are sited in an efficient, timely manner while acknowledging and mitigating any community impacts created by these facilities.

- E.1. Essential public facilities are those defined by state law, through the City's planning process or on application of a service provider.

- E.2. Sponsors of essential public facilities should be encouraged to consult with the City prior to choosing a site in order to seek information about potential sites, provide information concerning project proposals, identify potential community impacts, and propose possible siting incentives or mitigation measures.
- E.3. The City shall assure adequate public notice and participation in the siting of essential public facilities by reviewing these facilities through a conditional use process, allowing the identification of community impacts and mitigation measures. Because the City's normal notification requirements may not provide for adequate public notice to the project's impact area, the project sponsor shall develop a public participation plan designed to encourage early public involvement in the siting decision and identification of impacts and mitigation measures.
- E.4. The City shall develop decision criteria for the siting of essential public facilities which allow the sponsor to demonstrate:
  - E.4.a. the need for the facility,
  - E.4.b. its consistency with adopted plans and policies,
  - E.4.c. its location is designed to serve its service population,
  - E.4.d. its location criteria is compatible with the siting of other essential public facilities,
  - E.4.e. the site is physically suitable for the facility, and
  - E.4.f. the project is able to mitigate community impacts.
- E.5. City policies and procedures – including any conditional use process – shall be interpreted and administered in accordance with the admonition contained in the Growth Management Act that no development plan or development regulation may preclude the siting of essential public facilities.

**Concurrency Management Goal F.** Provide a system of concurrency management that will assure that the facilities needed to support city services are provided in a timely and coordinated manner.

- F.1. For transportation facilities, assure that the facilities or services needed to meet level-of-service standards are in place at the time of development, or assure that a financial commitment is in place to complete the improvements or strategies within six years. These facilities or services must be provided by either the City or the appropriate public or private developer.
- F.2. For park facilities, new growth or development will create additional demand for park facilities. Fees collected from the "Park Impact Fee" can only be applied to projects resulting from city-wide development growth and cannot be used to mitigate existing shortfalls of the parks system.

---

## Performance Measures

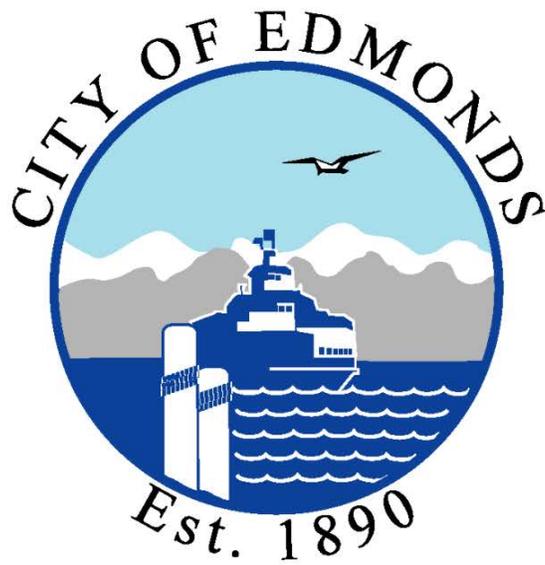

The Comprehensive Plan contains a small number performance measures (no more than one per element) that can be used to monitor and annually report on the implementation and effectiveness of the Comprehensive Plan. Performance measures, as identified in the Comprehensive Plan, are specific, meaningful, and easily obtainable items that relate to sustainability and can be reported on an annual basis. They are intended to help assess progress toward achieving the goals and policy direction of each major Comprehensive Plan element.

The measure identified below is specifically called out as matching the above criteria and being important to capital facilities goals and will be reported annually, along with performance measures for other Comprehensive Plan elements. It is not intended to be the only measure that the City may use for capital facilities purposes.

**Performance Measure:** Project delivery results - based on comparing projects in the Capital Facilities Plan to what is actually done on the projects.

# CITY OF EDMONDS

## CAPITAL FACILITIES PLAN 2015-2020

Project Name	Purpose	Grant Opportunity	Current Project Phase	(2016-2020) Total Cost	Revenue Sources	2015	2016	2017	2018	2019	2020	2021-2025

<b>PROJECT NAME:</b> Aquatic Facility	<b>ESTIMATED PROJECT COST:</b> \$5,000,000 – \$23,000,000
---------------------------------------	---

**PROJECT DESCRIPTION:** Implement recommendations of the Aquatics Feasibility Study completed in 2009. Six scenarios were presented and the plan recommended by the consultants was a year round indoor pool with an outdoor recreational opportunity in the summer. The project is dependent upon a public vote.

**PROJECT BENEFIT/ RATIONALE:** The current Yost Pool, built in 1972, is nearing the end of its life expectancy. The comprehensive study done in 2009 assessed the needs and wants of Edmonds citizens in regard to its aquatic future as well as the mechanical condition of the current pool.

**SCHEDULE:** 2014-2025

<b>PROJECT NAME:</b> Art Center / Art Museum	<b>ESTIMATED PROJECT COST:</b> \$5,000,000
--	--

**PROJECT DESCRIPTION:** A new Art Center/Museum facility will provide and promote Cultural / Arts facilities for the City of Edmonds. The need for visual and performing arts facilities is a high priority stated in the adopted updated Community Cultural Arts Plan 2001 and in the 2008 update process.

**PROJECT BENEFIT/ RATIONALE:** The City of Edmonds desires to secure and provide for public Cultural Arts facilities in the community. The emphasis on the arts as a high priority creates the need to determine feasibility for and potentially construct new visual arts related facilities.

**SCHEDULE: 2014-2025**

---	---------------------------------------

6<sup>th</sup> Street N. and Edmonds Street, Edmonds City limits, Snohomish County  
 8.1 acres / property owned and leased from Edmonds School District until 2021; Community Park/Zoned Public

**PROJECT DESCRIPTION:** Acquire or work with the School District to develop this 8.1 acre property for continued use as an important community park, sports tourism hub and site of some of Edmonds largest and most popular special events in downtown Edmonds.

**PROJECT BENEFIT/ RATIONALE:** Gain tenure and control in perpetuity over this important park site for the citizens of Edmonds.

**SCHEDULE:** 2014-2025

<b>PROJECT NAME:</b> Community Park / Athletic Complex at the Former Woodway High School	<b>ESTIMATED PROJECT COST:</b> \$11,535,000
--	---

**PROJECT DESCRIPTION:** Develop community park and regional athletic complex with lighted or unlighted fields and recreational amenities in partnership with Edmonds School District, community colleges, user groups, and other organizations. Development dependent upon successful regional capital campaign. \$10m - \$12M project.

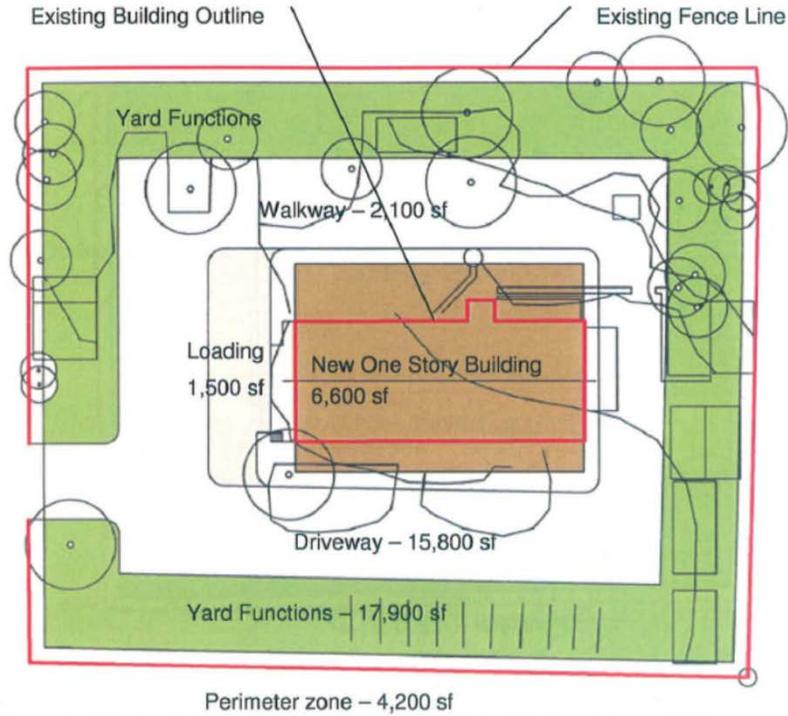

**PROJECT BENEFIT/ RATIONALE:** The site is currently an underutilized and undermaintained facility with great potential as community multi-use active park. Site has existing controlled access, greenbelt, parking and 4-court tennis facility with substandard fields. Highly urbanized area with 150,000 residents within 5-mile radius. Future maintenance supported by user fees.

**SCHEDULE:** 2014-2025

<b>PROJECT NAME:</b> Senior Center grounds	<b>ESTIMATED PROJECT COST:</b> \$1-2M
--	---------------------------------------

**PROJECT DESCRIPTION:** Rehabilitate grounds, parking, beach access and area around Senior Center, in conjunction with the construction of a new Senior Center building.

**PROJECT BENEFIT/ RATIONALE:** This facility is at the end of its useful life. The Edmonds Senior Center, a nonprofit, will be launching a capital campaign to reconstruct the Senior Center and seek a long term land lease with the City. It is the City's intent to rehabilitate the grounds and beach access surrounding the Sr. Ctr when construction begins.

**SCHEDULE:** Work with Sr. Center on timing of construction and grounds rehab.

<b>PROJECT NAME:</b> 212 <sup>th</sup> St. SW @ 84 <sup>th</sup> Ave. W (5-Corners) Intersection Improvements	<b>ESTIMATED PROJECT COST:</b> \$4,305,000
---	--

**PROJECT DESCRIPTION:** The intersection of 84<sup>th</sup> Ave and 212<sup>th</sup> is 5 legged, which also includes Main Street and Bowdoin Way approaches. The intersection is stop-controlled for all approaches. A roundabout would be constructed. The project also includes various utility upgrades and conversion of overhead utilities to underground. (ROADWAY ROJECT PRIORITY in 2009 Transportation Plan: #6).

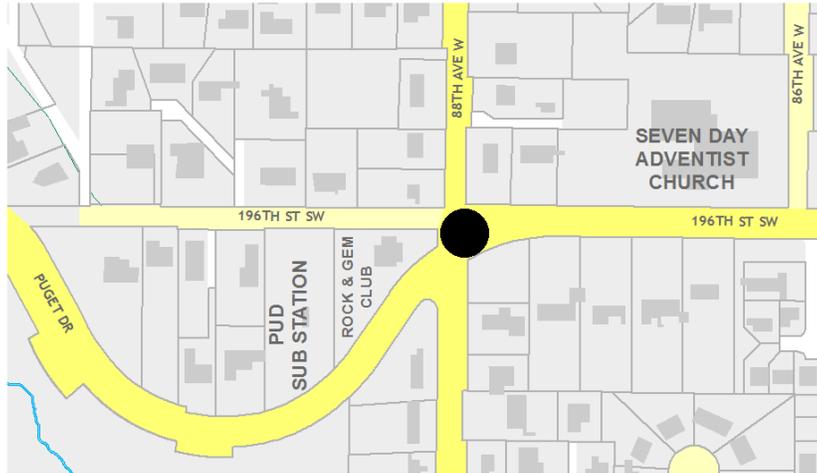

**PROJECT BENEFIT/ RATIONALE:** The intersection currently functions at LOS F and delays during the PM peak hour will worsen over time. A roundabout will improve the LOS.

**SCHEDULE:** Construction documentation will be completed in 2015.

**PROJECT NAME:** SR-524 (196<sup>th</sup> St. SW)/ 88<sup>th</sup> Ave. W Intersection Improvements

**ESTIMATED PROJECT COST:** \$1,115,000

**PROJECT DESCRIPTION:** Install traffic signal at the intersection of 196<sup>th</sup> St. SW @ 88<sup>th</sup> Ave. W. The modeling in the 2009 *Transportation Plan* indicated that restricting northbound and southbound traffic to right-turn-only (prohibiting left-turn and through movements) would also address the deficiency identified at this location through 2025. This is same alternative as one concluded by consultant in 2007 study but not recommended by City Council. This could be implemented as an alternate solution, or as an interim solution until traffic signal warrants are met. The ex. LOS is F (below City Standards: LOS D). (ROADWAY ROJECT PRIORITY in 2009 Transportation Plan: #8).

**PROJECT BENEFIT/ RATIONALE:** Improve traffic flow characteristics and safety at the intersection. The improvement would modify LOS to A, but increase the delay along 196<sup>th</sup> St. SW.

**SCHEDULE:** The intersection LOS must meet MUTCD traffic signal warrants and be approved by WSDOT since 196<sup>th</sup> St. SW is a State Route (SR524). No funding is currently allocated to this project (pending grant funding).

<b>PROJECT NAME:</b> Main St and 9 <sup>th</sup> Ave. S (interim solution)	<b>ESTIMATED PROJECT COST:</b> \$10,000
---	---

**PROJECT DESCRIPTION:** Installation of a mini-roundabout or re-striping of 9<sup>th</sup> Ave. with the removal of parking on both sides of the street. (not included in the 2009 Transportation Plan project priority chart)

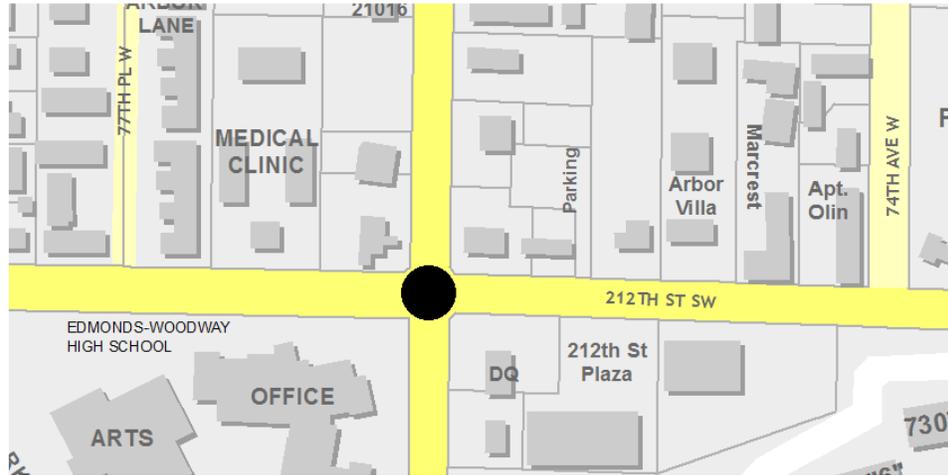

**PROJECT BENEFIT/ RATIONALE:** The intersection is stop-controlled for all approaches and the existing intersection LOS is E (below the City’s concurrency standards: LOS D). The re-striping of 9<sup>th</sup> Ave. would improve the intersection delay to LOS C or LOS B with the installation of a mini-roundabout.

**SCHEDULE:** 2016

**PROJECT NAME:** 76<sup>th</sup> Ave W @ 212<sup>th</sup> St. SW  
Intersection Improvements

**ESTIMATED PROJECT COST:** \$6,191,000

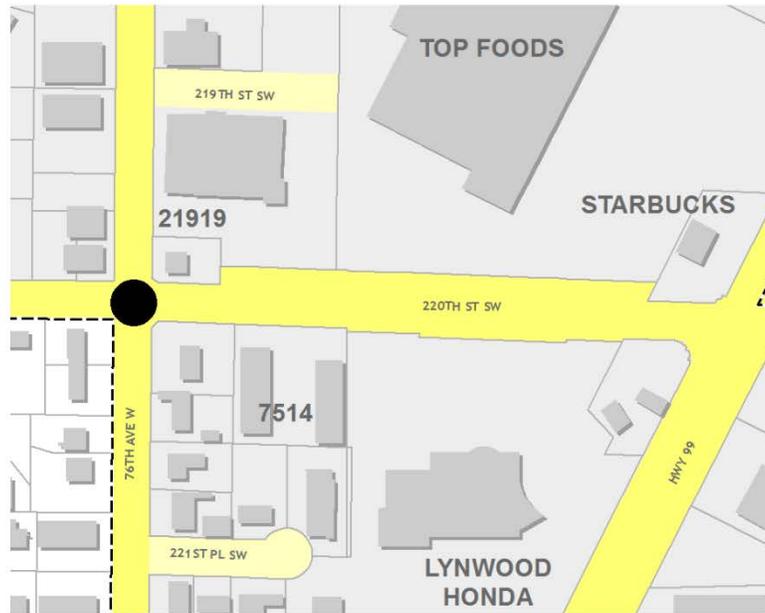

**PROJECT DESCRIPTION:** Add a northbound and southbound left-turn lane to convert the signal operation for those approaches from split phasing to protected-permissive phasing. Add a right-turn lane for the westbound, southbound, and northbound movements. The project also consists of various utility upgrades and conversion of overhead utilities to underground (ROADWAY PROJECT PRIORITY in 2009 Transportation Plan: #3).

**PROJECT BENEFIT/ RATIONALE:** Reduce the intersection delay and improve the existing level of service from LOS D (LOS F by 2015) to LOS C.

**SCHEDULE:** Federal grants have been secured for all project phases. Design started in 2012 and is scheduled for completion in Fall 2015. Right-of-way acquisition is anticipated to be completed in Fall 2015. Construction is scheduled to begin in 2016.

**PROJECT NAME:** 228<sup>th</sup> St. SW Corridor  
Safety Improvements

**ESTIMATED PROJECT COST:** \$7,300,000

**PROJECT DESCRIPTION:** 1) Extend 228<sup>th</sup> St across the unopened right-of-way to 76<sup>th</sup> Avenue West 2) Signalize the intersection of 228<sup>th</sup> St SW @ SR99 and 228<sup>th</sup> St. SW @ 76<sup>th</sup> Ave. West 3) Construct a raised median in the vicinity of 76<sup>th</sup> Avenue West. 4) Add illumination between 224<sup>th</sup> St SW and 228<sup>th</sup> St SW on SR 99 5) Overlay of 228<sup>th</sup> St. SW from 80<sup>th</sup> Ave. W to ~ 2,000' east of 76<sup>th</sup> Ave. W. (ROADWAY ROJECT PRIORITY in 2009 Transportation Plan: #1).

**PROJECT BENEFIT/ RATIONALE:** The project will improve access / safety to the I-5 / Mountlake Terrace Park & Ride from SR99. This east / west connection will reduce demand and congestion along two east-west corridors (220th Street SW and SR104). Roadway safety will also be improved as SR 99/ 228th Street SW will become a signalized intersection. 228<sup>th</sup> St. SW is being overlaid from 80<sup>th</sup> Pl. W to ~ 1,000 LF east of 72<sup>nd</sup> Ave. W. as well as 76<sup>th</sup> Ave. W from 228<sup>th</sup> St. SW to Hwy. 99. The project consists of various utility upgrades.

**SCHEDULE:** Construction scheduled to begin in 2015 and be completed in 2016. Federal and State grants were secured for the construction phase. This project is combined into one construction contract with the Hwy. 99 (Phase 3) Lighting project.

**PROJECT NAME:** Highway 99 Gateway / Revitalization

**ESTIMATED PROJECT COST:** \$10,000,000

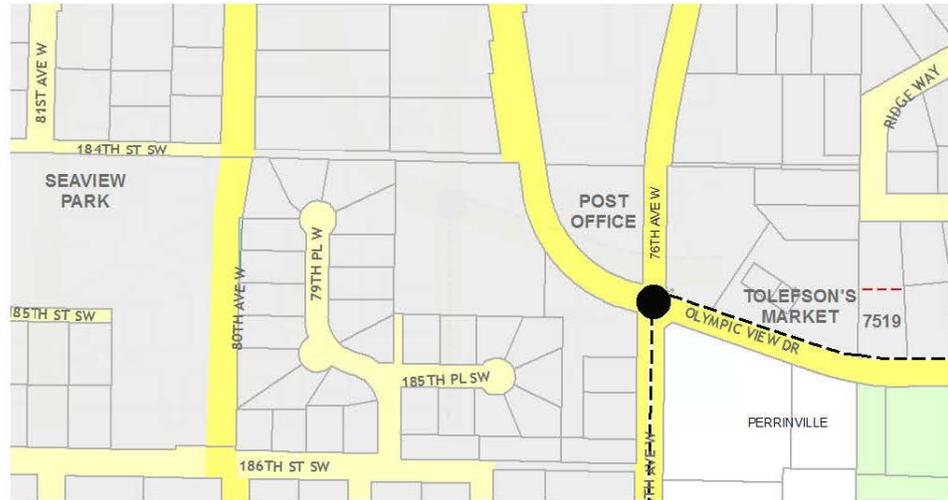

**PROJECT DESCRIPTION:** The project would include, among other features, wider replacement sidewalks or new sidewalk where none exist today, new street lighting, center medians for access control and turning movements, etc., attractive and safe crosswalks, better stormwater management, targeted utility replacements, potential undergrounding of overhead utilities, as well as landscaping and other softscape treatments to warm-up this harsh corridor and identify the area as being in Edmonds.

**PROJECT BENEFIT/ RATIONALE:** Improve aesthetics, safety, user experience, and access management along this corridor. In addition, economic development would be improved.

**SCHEDULE:** The design phase is scheduled for 2018. The construction phase is scheduled for 2019 and 2020 (unsecured funding for all phases).

<b>PROJECT NAME:</b> 84 <sup>th</sup> Ave. W (212 <sup>th</sup> St. SW to 238 <sup>th</sup> St. SW)	<b>ESTIMATED PROJECT COST:</b> \$20,422,000
---	---

**PROJECT DESCRIPTION:** Widen 84<sup>th</sup> Ave. W to (3) lanes with curb, gutter, bike lanes, and sidewalk on each side of the street. (part of this project was ranked #11 in the Long Walkway list of the 2009 Transportation Plan).

**PROJECT BENEFIT/ RATIONALE:** Improve overall safety of the transportation system along this collector street: 1) the sidewalk and bike lanes would provide pedestrians and cyclists with their own facilities and 2) vehicles making left turn will have their own lane, not causing any back-up to the through lane when insufficient gaps are provided.

**SCHEDULE:** Engineering and Construction are scheduled between 2021 and 2026 (unsecured funding). The project cost is split between Snohomish County and Edmonds since half the project is in *Esperance*.

# **STORMWATER**

**PROJECT NAME:** Edmonds Marsh/Shellabarger Cr/Willow Cr – Daylighting

**ESTIMATED PROJECT COST:** \$7,233,000

Edmonds Marsh as seen from the viewing platform.

Previously restored section of Willow Creek. Source: [www.unocaledmonds.info/clean-up/gallery.php](http://www.unocaledmonds.info/clean-up/gallery.php)

**PROJECT DESCRIPTION:** Build on the feasibility study completed in 2013 that assessed the feasibility of day lighting the Willow Creek channel. The final project may include 23 acres of revegetation, construct new tide gate to allow better connectivity to the Puget Sound, removal of sediment, 1,100 linear ft of new creek channel lined with an impermeable membrane. Funds will be used for study and construction but exact breakdown cannot be assessed at this time.

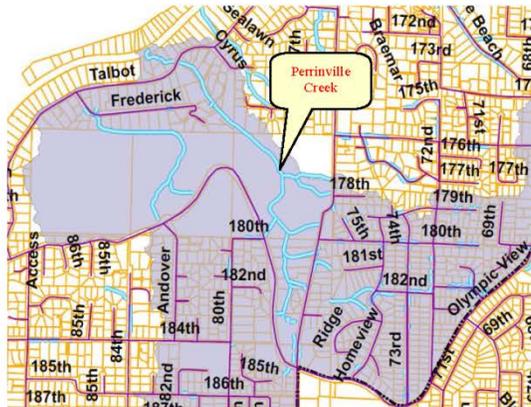

**PROJECT BENEFIT/ RATIONALE:** The daylight of willow creek will help reverse the negative impacts to Willow Creek and Edmonds Marsh that occurred when Willow Creek was piped. It will also help eliminate the sedimentation of the marsh and the transition to freshwater species and provide habitat for salmonids, including rearing of juvenile Chinook.

Eng. & Admin.	\$363,000	\$750,000				\$20,000
Construction			\$1,100,000	\$2,400,000	\$2,600,000	
1% for Art						
<b>TOTAL</b>	<b>\$363,000</b>	<b>\$750,000</b>	<b>\$1,100,000</b>	<b>\$2,400,000</b>	<b>\$2,600,000</b>	<b>\$20,000</b>

<b>PROJECT NAME:</b> Perrinville Creek High Flow Reduction/Management Project	<b>ESTIMATED PROJECT COST:</b> \$2,270,000
---	--

Perrinville Creek Channel illustrating the channel incision that will be addressed by restoration.

**PROJECT DESCRIPTION:** A flow reduction study began in 2013 that will develop alternatives to implement in the basin. Projects are expected to begin the design and/or construction phases in 2014. It is expected that this project will be implemented with the City of Lynnwood (half the Perrinville basin is in Lynnwood) and Snohomish County (owner of the South County Park). Projects will likely be a combination of detention, infiltration, and stream bank stabilization. A \$188,722 grant from the Department of Ecology is contributing funds to the 2013-2014 Study.

**PROJECT BENEFIT/ RATIONALE:** Urbanization of the Perrinville Creek Basin has increased flows in the creek, incision of the creek, and sedimentation in the low-gradient downstream reaches of the creek. Before any habitat improvements can be implemented, the flows must be controlled or these improvements will be washed away.

**SCHEDULE:** 2015-2020
