Hutt Park Vandalized Tree Replacement Report Available

<http://www.edmondswa.gov/government/departments/parks-recreation-a-cultural-services/about-us/park-planning-projects.html>

In late August, many trees were found to have been vandalized at Hutt Park in Edmonds, WA. The City hired American Forest Management of Kirkland, WA to prepare an arborist's report regarding the damage. The Hutt Park Vandalized Tree Replacement Report has been provided to the City and is now available to view on the City website. Please follow this link and scroll to the bottom of the page under Projects: <http://www.edmondswa.gov/government/departments/parks-recreation-a-cultural-services/about-us/park-planning-projects.html>. The report details the number and type of trees which were vandalized and lays out options for dealing with the damage to the Hutt Park Forest.
