CITY OF EDMONDS STORMWATER CODE UPDATE

Public Meetings will be held July 20, 2016 to highlight significant code changes.

(Edmonds - WA) The City of Edmonds is required to update its stormwater code by December 31, 2016 to meet the minimum requirements of the 2014 Ecology Stormwater Management Manual. The public meetings will provide an opportunity to learn more about the proposed stormwater code changes, see examples of what stormwater design will look like under the new code and answer questions.

Two public meetings are being offered in an effort to effectively present information. The first meeting will be geared towards land development professionals who are knowledgeable in stormwater codes and regulations. The second meeting will be open to the public who wish to gain a better understanding of stormwater requirements as they relate to development.

Date: July 20, 2016

Place: Public Works – Operations and Maintenance Building
7110 – 210th St SW, Edmonds WA 98026

Time: **3pm** – Developers, contractors, engineers and stormwater design professionals
5pm – General public, including homeowners, business owners & residents
