Help Local Entrepreneurs: Remember to Patronize Five Corners Businesses

(Edmonds – WA) With construction of the new five corners roundabout well-underway, the City would like to remind residents that they can help support local entrepreneurs at that intersection by patronizing their establishments. Parking lots for all businesses are open to ingress and egress, save those on 84th Ave N where a very large stormwater detention vault is currently being installed. These business owners have invested in our community and we encourage our citizens to consider what they can do to assist them during this disruption in their normal business conditions. The City would also like to remind motorists to please pay attention to other drivers and signage throughout the intersection and to not block entry or exit to the parking lots as much as possible. Thank you very much in advance for your awareness and understanding.

The construction phases of the roundabout are proceeding on schedule. The full schedule can be viewed here: [Roundabout Construction Schedule](#). Also, the most recent construction progress report from the City can be viewed here: [Construction Progress Report #2](#).

The City will be mobilizing two Variable Message Signs (VMS) within the next week which will be able to provide current information to all traffic passing through the site about access issues, major changes in traffic control procedures, and also reminding everyone that all businesses are open and operating and encouraging our citizens to support them. Any specials being offered by Five Corners businesses or other retail messages will also be posted as time permits.

Flagger at the intersection will continue to provide traffic control and ensure safe and organized passage for all modes of travel through the work zone while our contractors are on-site each day. After hours the intersection will be controlled by stop signs as it was prior to construction beginning.
