2017 SEWER REPLACEMENT PROJECT Local Street and Recreational Path Closure

The City of Edmonds will be kicking off the Design Phase of the 2017 Sewer Replacement Project this month, with geotechnical exploration starting on Monday, August 29th. This initial phase of work will involve drilling 8 separate exploratory borings along:

- Maple Street, between 10th Ave S and Yost Park(2 borings)
- along the main path through Yost Park located north of the pool (3 borings)
- along Shell Valley Road between Yost Park and Pioneer Way(1 boring)
- along Pioneer Way north of Shell Valley Road(2 borings)

This work will evaluate underground soil conditions for the upcoming design of the project and require temporary path closures, no-parking zones, and potential lane closures as the drilling equipment advances along the corridor. Temporary path closures within Yost Park will require park users to use alternate path routes within the park. If temporary lane closures are necessary in roadways, alternating one-way traffic will be maintained at all times throughout the duration of the closures. Work is expected to last a few hours at each boring location, and on-street parking will be reopened on a rolling basis. The exploration program is expected to be completed by the end of the day Tuesday, August 30th, at which time the roadways and paths will be fully reopened.

Neighbors should expect construction noise and traffic impacts during the hours of 7:00 am to 6:00 pm during this time. Questions can be directed to Mike De Lilla, Senior Utilities Engineer, City of Edmonds, at (425) 771-0220 .
