PUBLIC MEETING
Dayton Street Utility Replacement Project – Construction Start

(Edmonds - WA) Construction of the Dayton Street Utility Replacement Project from 3rd to 9th Ave will begin May 13, 2019. The project will replace the street and upsize the existing sanitary sewer, potable water and storm water drain pipes from 3rd Ave S to 9th Ave S. The goal of the project is to replace old sewer and water pipes while increasing capacity to the City’s drainage system. Increasing drainage capacity will help to alleviate flooding in downtown Edmonds during intense rain events.

A public meeting will be held Wednesday, May 8, 2019 from 6 to 7:30 pm in City Hall, Brackett Room. Please attend to meet the contractor and the City’s construction management team, and learn more about the project specifics, phasing, public impacts and proposed construction schedule.

Questions: Contact Michele (Mike) De Lilla, (425)771-0220; via e-mail at mike.delilla@edmondswa.gov
